Name _____

Shape Sleuth Answer Key

1. A. Symmetry
2. B. Gap
3. A. Outlier
4. A. Skewed left
5. A. Skewed right
6. B. Peak at 6

Teacher's Guide

- Quick implementation: Review cluster, gap, peak, outlier, symmetry, and skew before students begin. Remind students to examine the overall shape, not just one dot.
- Differentiation: For support, provide a short definition of each feature. For added challenge, have students describe a second noticeable feature when possible.
- Engagement: Have students treat each display as a data clue and identify the feature that makes its shape distinctive.
- Extension: Ask students to create a small dot plot showing one assigned feature, then have a partner identify the feature.
