Name _____

Library Books Data Answer Key

1. 5 books
2. 7 books
3. Friday
4. Wednesday
5. 4 books
6. 12 books
7. 18 books
8. 6 books
9. 34 books
10. 3 days

Teacher's Guide

- Quick implementation: Have students read the graph from left to right before answering the questions. Remind them to check the scale on the vertical axis.
- Differentiation: For support, allow students to write each bar's value below the graph before answering. For a challenge, have students answer without recording the individual values first.
- Engagement: Ask students to pretend they are library data detectives looking for useful facts hidden in the graph.
- Extension: Have students write two additional questions that can be answered using the same bar graph, then trade questions with a partner.
