Name _____

Data Skills Check Answer Key

1) 30 students

2) 9 students

3) C. 35

4) Tuesday and Wednesday

5) A. Increasing

6) 10

7) 7

8) 26

9) 6

10) 25

11) A. Class A

12) B. Most students in the sample prefer outdoor recess.

Teacher's Guide

- Quick implementation: Use this as an independent review or short assessment after instruction on interpreting different forms of data.
- Differentiation: For support, review mean, median, range, trend, peak, and outlier before students begin. For added challenge, require students to justify Questions 11 and 12.
- Engagement: Let students earn one point for each correct response and challenge them to identify which data skill each question tests.
- Extension: Have students create a 5-value data set with a specified mean, median, or range and write one valid conclusion about it.
