Name _____

Claim Check Answer Key

1. A
2. B
3. A
4. C
5. B
6. A
7. C
8. B

Teacher's Guide

- Quick implementation: Ask students to compare every statement with the displayed data before choosing an answer.
- Differentiation: For support, have students underline the values that prove or disprove each statement. For added challenge, ask students to explain why one incorrect choice is not supported.
- Engagement: Have students act as data judges who must approve only claims that have clear numerical evidence.
- Extension: Ask students to create one supported claim and one unsupported claim for any data display, then have a partner identify which is valid.
