Name _____

Evidence Check Answer Key

1. Yes
2. Yes
3. No
4. Yes
5. No
6. Yes
7. Yes
8. No
9. Yes
10. No

Teacher's Guide

- Quick implementation: Emphasize that students should use only information shown in the data display. A statement may sound reasonable but still cannot be determined from the data.
- Differentiation: For support, have students underline the numbers that provide evidence for each Yes answer. For added challenge, ask students to explain what extra information would be needed for each No answer.
- Engagement: Let students act as evidence investigators who must decide whether each statement has enough proof.
- Extension: Have students write one new statement that can be determined from the data and one that cannot, then exchange statements with a partner.
