

Name _____

Water Trend Tracker Answer Key

1. Decreasing
2. Increasing
3. Same
4. Increasing
5. Increasing
6. Same
7. Decreasing
8. Decreasing
9. Same
10. Increasing

Teacher's Guide

- Quick implementation: Review that a line rising from left to right is increasing, a falling line is decreasing, and a horizontal line remains the same.
- Differentiation: Let students trace each interval with a finger before classifying it.
- Engagement: Have students use hand motions pointing up, down, or straight across to represent each interval.
- Extension: Ask students to identify the longest stretch of time during which the water level did not decrease.
