4. 10 minutes
5. Thursday
6. 10 minutes
7. Both teams increased overall.
8. Team B, by 10 more minutes. Team A increased 15 minutes, and Team B increased 25 minutes.

Teacher's Guide

- Quick implementation: Have students identify which line represents each team before answering the questions.
- Differentiation: Let students trace one team's line at a time and record its values before making comparisons.
- Engagement: Have partners compete to locate each requested value, then explain how they found it.
- Extension: Ask students to calculate each team's total practice time for the five days and compare the totals.
