Name _____

Mean Minute Answer Key

1. 6
2. 10
3. 10
4. 15
5. 10
6. 18
7. 8
8. 20
9. 14
10. 24

Teacher's Guide

- Quick implementation: Review the procedure: add all values, count the values, then divide the sum by the number of values.
- Quick implementation: Complete one example together before students work independently.
- Differentiation: Allow students who need support to write the sum and number of values beside each problem before dividing.
- Differentiation: Encourage students to check addition with a calculator after finding each mean by hand.
- Engagement: Challenge students to complete the problems accurately within a reasonable class time, then check their results.
- Extension: Have students choose three problems and add one new value that keeps the mean unchanged.
- Extension: Ask students to create a four-value data set with a whole-number mean for a partner to solve.
