Name _____

Mean Connections Answer Key

1. E, mean = 7
2. D, mean = 12
3. D, mean = 12
4. A, mean = 15
5. F, mean = 16
6. B, mean = 9
7. H, mean = 17
8. C, mean = 20

Teacher's Guide

- Quick implementation: Remind students to add all values and divide the sum by the number of values before choosing an answer.
- Quick implementation: Have students write the calculated mean beside each data set before matching it to the answer bank.
- Differentiation: Allow students who need support to write a sum and division equation for each item.
- Differentiation: For added challenge, cover the answer bank until students have calculated all eight means.
- Engagement: Have students cross out answer choices as they make matches, while reminding them that a choice may be used more than once.
- Extension: Ask students to create a new data set that has one of the means from the answer bank.
- Extension: Challenge students to create two different data sets that have the same mean.
