Name _____

Measure Match Answer Key

1. H, median = 9
2. C, mode = 7
3. D, range = 16
4. F, median = 18
5. G, mode = 15
6. D, range = 16
7. E, median = 6
8. J, mode = 24
9. F, range = 18
10. I, median = 11

Teacher's Guide

- Quick implementation: Review the meaning of median, mode, and range before students begin. Students calculate each requested measure first, then locate the result in the answer bank.
- Differentiation: Allow students to label each problem M for median, Mo for mode, or R for range and use scratch space to order values when finding a median.
- Engagement: Have students complete the calculations independently, then compare their matched letters with a partner.
- Extension: Ask students to create three new data sets whose median, mode, or range matches unused values from the answer bank.
