Name _____

Frequency Detective Answer Key

1. 7
2. 12
3. 18
4. 6
5. 25
6. 17
7. 38
8. 5
9. 26
10. 46

Teacher's Guide

- Quick implementation: Review that the mode is the value that occurs most often. Have students count how many times each repeated value appears before choosing the mode.
- Differentiation: Allow students to circle repeated values or make tally marks beside the data sets. Begin with shorter sets for students who need additional support.
- Engagement: Ask students to predict the mode at first glance, then verify their prediction by counting each value's frequency.
- Extension: Have students change one value in a data set to create a different mode, then explain how the change affected the frequencies.
