

Name _____

Pirate Treasure (Addition & Subtraction Only)

Captain Ruby and her pirate crew are searching for hidden treasure across the Seven Seas! Use **order of operations** - start with parentheses first - to help the crew keep track of their gold, jewels, and loot!

1. The crew found $(45 + 25) - 30$ gold coins on the first island.
How many coins do they keep?
2. They buried $(60 - 25) + 40$ gems in the sand.
How many gems in total?
3. Ruby shared $(80 + 20) - 50$ pearls among the crew.
How many pearls remain?
4. The pirates discovered $(100 - 35) + 60$ pieces of silver.
How much silver did they find?
5. The lookout spotted $(75 + 25) - 40$ barrels of food.
How many barrels are left?
6. The treasure chest contained $(90 - 35) + 15$ rubies.
How many rubies total?
7. They lost $(120 - 80) + 25$ coins in a storm.
How many coins were lost?
8. The captain traded $(150 - 90) + 20$ jewels for supplies.
How many jewels were traded?
9. The crew found $(60 + 30) - 45$ doubloons under the sand.
How many doubloons remain?
10. Ruby discovered $(200 - 150) + 75$ gold bars in a secret cave.
How many gold bars in all?
