

Name _____

Measurement Problems Answer Key

1. 7.60 km
2. 4.95 m
3. 2.60 L
4. 1.7 kg
5. 0.85 km
6. 4.4 L
7. 4.5 km
8. 6 complete batches

Teacher's Guide

- Review the units in each problem before students begin solving.
- Encourage students to underline important numbers and identify the operations needed before calculating.
- Support students by having them solve one step at a time and label each intermediate answer with its unit.
- Ask pairs of students to compare their operation choices and explain their reasoning.
- Invite students to estimate each answer first to check whether their final answer is reasonable.
- Extend learning by having students write their own multi-step measurement problem using decimal values and exchange it with a classmate.
