

Name _____

Operation Mix Answer Key

- | | |
|---------|----------|
| 1. 7.15 | 9. 15 |
| 2. 5.72 | 10. 6.23 |
| 3. 5 | 11. 3.6 |
| 4. 8 | 12. 4 |
| 5. 6.96 | 13. 5.93 |
| 6. 4.65 | 14. 8.76 |
| 7. 2.8 | 15. 3.6 |
| 8. 9 | 16. 7 |

Teacher's Guide

- Have students solve independently first, then compare answers with a partner.
- Encourage students to look for clues such as the size of the numbers to check whether an answer is reasonable.
- Allow place value charts or graph paper for students who need help lining up decimal points.
- Challenge advanced students to explain how they knew which operation to use for each problem.
- Turn the activity into a timed fluency sprint after students have practiced the skills.
- Ask students to write one new decimal problem for each operation and exchange with a classmate.
