

Name _____

Solve and Match Answer Key

1. 7.85 - A
2. 7.35 - E
3. 4 - D
4. 8 - C
5. 11 - B
6. 10.25 - F
7. 3.6 - G
8. 5.5 - H

Challenge Answer: There is no repeated value after correcting the cards.

Teacher's Guide

- Cut out or project the answer cards so students can physically or visually match them to the problems.
- Encourage students to estimate first to eliminate unlikely answer cards before calculating exactly.
- Pair students to compare matches and explain how they verified each answer.
- Support learners by reviewing decimal place value and the order of operations before starting.
- Turn the activity into a timed matching challenge for additional fluency practice.
- Extend learning by having students create four new decimal problems and a matching set of answer cards for a classmate.
