

Name _____

Moon Size Scaling

Instructions: Below are the names of 10 moons in our Solar System, along with their diameters (in kilometers) **scrambled out of size order**. Your task is to write the correct order from **largest (1)** to **smallest (10)**.

- **Europa** – 3,121 km
- **Ganymede** – 5,268 km
- **Io** – 3,643 km
- **Callisto** – 4,821 km
- **Titan** – 5,150 km
- **Triton** – 2,710 km
- **Enceladus** – 504 km
- **The Moon (Earth's)** – 3,474 km
- **Rhea** – 1,527 km
- **Phobos** – 22.5 km

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____

Bonus Challenge:

After ordering them, circle the ones that are **larger than Earth's Moon**.
