

Name _____

Choosing The Cause Answer Key

1. **C** - The storm outside caused the power outage, leading to the lights going out.
2. **A** - The sudden darkness made the audience nervous.
3. **D** - The teacher reacted to the power loss by finding alternative light sources.
4. **B** - The students adapted and performed without equipment, which impressed the audience.

Teacher Notes:

- Emphasize that a **cause** answers the "Why did this happen?" question.
- Highlight how one cause can lead to **multiple effects** (storm → lights out + microphones failing + audience whispering).
- Encourage students to look for **direct links** between actions and outcomes.
