

Name _____

Division with Remainders (Triple-Digit Divisors - Inverse Format)

Directions: Complete each problem to find the **dividend**. Then write the full **division sentence** below it.

1. $125 \times 4 + 23 = \underline{\quad}$ $\rightarrow \underline{\quad} \div 125 = \underline{\quad} \text{ R } \underline{\quad}$

2. $214 \times 5 + 76 = \underline{\quad}$ $\rightarrow \underline{\quad} \div 214 = \underline{\quad} \text{ R } \underline{\quad}$

3. $302 \times 3 + 19 = \underline{\quad}$ $\rightarrow \underline{\quad} \div 302 = \underline{\quad} \text{ R } \underline{\quad}$

4. $145 \times 6 + 87 = \underline{\quad}$ $\rightarrow \underline{\quad} \div 145 = \underline{\quad} \text{ R } \underline{\quad}$

5. $412 \times 2 + 59 = \underline{\quad}$ $\rightarrow \underline{\quad} \div 412 = \underline{\quad} \text{ R } \underline{\quad}$

6. $231 \times 7 + 45 = \underline{\quad}$ $\rightarrow \underline{\quad} \div 231 = \underline{\quad} \text{ R } \underline{\quad}$

7. $508 \times 4 + 62 = \underline{\quad}$ $\rightarrow \underline{\quad} \div 508 = \underline{\quad} \text{ R } \underline{\quad}$

8. $367 \times 5 + 91 = \underline{\quad}$ $\rightarrow \underline{\quad} \div 367 = \underline{\quad} \text{ R } \underline{\quad}$

9. $426 \times 3 + 77 = \underline{\quad}$ $\rightarrow \underline{\quad} \div 426 = \underline{\quad} \text{ R } \underline{\quad}$

10. $519 \times 2 + 84 = \underline{\quad}$ $\rightarrow \underline{\quad} \div 519 = \underline{\quad} \text{ R } \underline{\quad}$
