

Name _____

Division with Remainders (Single-Digit Divisor)

Directions: Divide. Write the **quotient** and the **remainder**.

1. $23 \div 4 = \underline{\quad} \text{ R } \underline{\quad}$

6. $35 \div 4 = \underline{\quad} \text{ R } \underline{\quad}$

2. $18 \div 5 = \underline{\quad} \text{ R } \underline{\quad}$

7. $41 \div 7 = \underline{\quad} \text{ R } \underline{\quad}$

3. $31 \div 6 = \underline{\quad} \text{ R } \underline{\quad}$

8. $59 \div 9 = \underline{\quad} \text{ R } \underline{\quad}$

4. $47 \div 8 = \underline{\quad} \text{ R } \underline{\quad}$

9. $27 \div 5 = \underline{\quad} \text{ R } \underline{\quad}$

5. $22 \div 3 = \underline{\quad} \text{ R } \underline{\quad}$

10. $46 \div 6 = \underline{\quad} \text{ R } \underline{\quad}$

Inverse Practice - Check Your Work

Directions: Use multiplication to check your division.

Remember: **Dividend = (Divisor \times Quotient) + Remainder**

1. $4 \times \underline{\quad} + \underline{\quad} = 23$ (Yes / No)

6. $4 \times \underline{\quad} + \underline{\quad} = 35$ (Yes / No)

2. $5 \times \underline{\quad} + \underline{\quad} = 18$ (Yes / No)

7. $7 \times \underline{\quad} + \underline{\quad} = 41$ (Yes / No)

3. $6 \times \underline{\quad} + \underline{\quad} = 31$ (Yes / No)

8. $9 \times \underline{\quad} + \underline{\quad} = 59$ (Yes / No)

4. $8 \times \underline{\quad} + \underline{\quad} = 47$ (Yes / No)

9. $5 \times \underline{\quad} + \underline{\quad} = 27$ (Yes / No)

5. $3 \times \underline{\quad} + \underline{\quad} = 22$ (Yes / No)

10. $6 \times \underline{\quad} + \underline{\quad} = 46$ (Yes / No)
