AI Myths - Short Article Annotation Answer Key

1. **Myth:** "Some people believe AI is completely neutral and always fair."
Correction: AI can reflect human biases from its training data, so it is not always neutral or fair.
2. **Myth:** "AI secretly plans to take over the world."
Correction: AI has no goals or secret plans; it only follows instructions from humans.
3. **Myth:** "AI is guaranteed to replace all human jobs in the future."
Correction: AI may automate some tasks, but it also creates new types of jobs and often works alongside humans.
4. **Myth:** "AI can feel emotions like happiness, sadness, or anger."
Correction: AI cannot feel emotions; it only simulates responses based on patterns.
