

AI Myths - Agree or Disagree? Answer Key

Note: Students may choose differently; what matters is their reasoning. Below are **sample correct placements with explanations**.

1. **AI has emotions and can feel happiness or sadness.** → Strongly Disagree (1)
AI cannot feel emotions; it only simulates responses.
2. **AI is used in hospitals to help doctors detect diseases earlier.** → Strongly Agree (5)
AI assists in analyzing X-rays, scans, and patterns to support doctors.
3. **AI will replace every human job in the future.** → Strongly Disagree (1)
AI may replace some tasks but also creates new jobs and often works best with humans.
4. **AI systems can sometimes reflect human biases from their training data.** → Strongly Agree (5)
AI can reflect unfairness in data; this is a real issue researchers work on fixing.
5. **AI is alive, just like animals and people.** → Strongly Disagree (1)
AI is not alive; it is computer software without consciousness.
6. **AI is always 100% accurate and never makes mistakes.** → Strongly Disagree (1)
AI can make errors depending on data and context.
