

Robots Don't Have Feelings Answer Key

(Student answers will vary; key shows correct fact-checks and sample reflections.)

1. **Feelings Myth:** AI cannot feel emotions; it only follows patterns.
Sample reflection: "I thought AI could feel because of movies, but now I know it can't."
2. **Alive Myth:** AI is not alive; it is computer software.
Sample reflection: "I used to think AI was alive because it talks, but I learned it's just code."
3. **Takeover Myth:** AI cannot take over the world; it has no secret plans.
Sample reflection: "I heard this in movies, but now I know it's pretend."
4. **Surprise Myth (Varies):** Students may choose any myth (examples: fairness, mistakes).
Sample reflection: "I didn't know AI could be unfair sometimes."
5. **Important Truth (Varies):** Likely answers include "AI makes mistakes," "AI is not alive," or "Everyone should understand AI."
Sample reflection: "I think the most important truth is that AI makes mistakes, because people need to double-check it."
