## Flashback Narratives

**Directions:** Read the prompt. Write a narrative that includes a clear flashback. Show when the story shifts from the present to a memory and then returns to the present.

*You are helping to clean out an old storage room at your community center. While sorting the dusty boxes, you find an object that reminds you of a moment from years ago. Write a story that shows what you are doing in the present and then includes a flashback that explains the memory triggered by the object.*

Your Narrative:
