| 2. isthmus      | 7. migration    |
| 3. archipelago  | 8. tundra       |
| 4. migration    | 9. climate zone |
| 5. tundra       | 10. isthmus     |

### Teacher's Guide

**Purpose:** This vocabulary quiz strengthens key geographic terms used when studying the continent of North America and helps students in grades 5 to 8 build word knowledge needed for map skills, landforms, climates, and ecological concepts.

### Instruction Tips

- Review each vocabulary word with visuals before beginning.
- Allow students to work independently first, then check with a partner.
- Encourage students to justify their answers using examples from North America.

### Differentiation

- Provide a glossary sheet for students who need additional support.
- Challenge advanced students to write a sentence using each vocabulary term.
- For English language learners, offer simple definitions alongside the options.

### Engagement Ideas

- Turn the quiz into a quick call and response warm up.
- Ask students to create hand motions to represent each term.
- Place vocabulary cards around the room and let students move to the correct card for each question.
