| 2. False | 7. True |
| 3. True | 8. True |
| 4. True | 9. False |
| 5. True | 10. True |

Teacher's Guide

Purpose: This worksheet helps students in grades 4 to 7 build foundational knowledge about North America's geography, climates, cultures, and ecosystems by evaluating factual statements.

Instruction Tips

- Read the instructions together and model how to evaluate one statement.
- Encourage students to use maps, classroom texts, or notes as references.
- Remind students to justify why a statement is true or false during discussion.

Differentiation

- Provide sentence starters for students who need support, such as I think this is true because.
- Allow students with strong understanding to rewrite two false statements so they become true.
- Offer small group instruction for students who benefit from guided practice.

Engagement Ideas

- Turn the worksheet into a classroom quiz game with teams.
- Have students stand for true and sit for false during a warm up round.
- Encourage students to create one true and one false statement to challenge their classmates.
