| 2. Mississippi | 7. Appalachian |
| 3. Sonoran | 8. Death |
| 4. Great | 9. The |
| 5. Colorado | 10. Yucatan |

Teacher's Guide

Purpose: This worksheet introduces students in grades 4 to 6 to major North American landforms through fill in the blank practice that reinforces vocabulary and geographic knowledge.

Instruction Tips

- Review landform vocabulary before assigning the worksheet.
- Display a labeled map while students work to support visual learners.
- Encourage students to read each sentence completely before choosing an answer.

Differentiation

- Provide a word bank for students who need additional support.
- Challenge advanced learners to write two new sentences using landform terms not included in the worksheet.
- Offer guided practice by completing the first one or two sentences as a class.

Extension Activities

- Students create a mini poster comparing two landforms from the worksheet.
- Connect to writing by having students describe a fictional journey across three different landforms.
- Assign a research prompt where students choose one landform and explain why it is important to its region.
