Teacher Notes / Guide

- This activity trains students to **invert the subject and auxiliary verb** (was/were) when forming questions.
- Common error: leaving the statement as is or forgetting to switch word order.
- Tip: Remind students that the main verb must stay in the **-ing form** (no changes).
- Extension idea: After forming questions, have students practice **short answers** (Yes, she was. / No, she wasn't). This reinforces both question and response forms.
