### Teacher's Guide

- Emphasize that **ph** makes the f sound, helping students visually and phonetically correct misspelled words.
- Encourage students to read each sentence aloud first to hear what sounds incorrect, then rewrite it carefully.
- For differentiation, provide a small ph-word reference chart for students who need support or reduce the number of corrections.
- For extension, ask students to write their own sentence containing a ph word with an intentional mistake, trade with a classmate, and fix each other's work for added practice.
