

Name _____

School Supply Graph Answer Key

1. 6
2. 4
3. 6
4. 6
5. 2
6. 6
7. 4
8. 4

Teacher's Guide

- Quick implementation: Review the key and remind students that each X represents 2 items. Have students find each category's total before comparing.
- Differentiation: Let students cross out matching symbols in the two rows, then count the symbols left over.
- Engagement: Have students predict which pair has the greatest difference before solving.
- Extension: Ask students to write two new "how many more" or "how many fewer" questions using the graph.
