

Name _____

Picture Graph Inspector Answer Key

1. Correct.
2. Incorrect. Add 1 X. There should be 5 X symbols.
3. Incorrect. Change "Pens" to "Pencils."
4. Correct.
5. Correct.
6. Incorrect. Remove 2 X symbols. There should be 2 X symbols.

Teacher's Guide

- Quick implementation: Have students check the data, key, category label, and number of symbols for each graph.
- Differentiation: Guide students to find the value represented by the symbols before deciding if a graph is correct.
- Engagement: Let students act as graph detectives and explain what clue helped them find each error.
- Extension: Have students create one incorrect picture graph for a partner to fix.
