Teacher's Guide

- Quick implementation: Review that the entire pie represents 100%, or the full \$800 budget.
- Differentiation: Have students solve percentage questions first, then use $\text{Amount} = \text{Percent} \times \text{Total}$ for dollar questions.
- Engagement: Ask students to predict the largest and smallest dollar amounts by comparing the sectors before calculating.
- Extension: Ask students to calculate the dollar amount for every category and verify that the amounts total \$800.
