

Estimate Links Answer Key

1. D
2. B
3. C
4. F
5. A
6. E

Teacher's Guide

- Quick implementation tips
 - o Remind students to identify the required place value before rounding.
 - o Encourage students to round each number before looking at the answer choices.
 - o Review one example together before independent practice.
- Differentiation strategies
 - o Provide a place value chart or number line for students who need support.
 - o Ask advanced students to find the exact answers and compare them with the estimates.
 - o Pair students to explain why each match is correct.
- Engagement ideas
 - o Cut apart the answer choices and let students physically match them to the problems.
 - o Have students justify one of their matches to a partner using rounding vocabulary.
- Extension activities
 - o Have students create a new word problem that matches one of the unused estimate formats.
 - o Ask students to rewrite one problem using different numbers while keeping the same estimated answer.
