

Round And Estimate Answer Key

1. $50 + 40 = 90$
2. 200
3. $300 + 500 = 800$
4. $70 + 30 = 100$
5. 600
6. $200 + 200 = 400$
7. $90 + 50 = 140$
8. 400

Teacher's Guide

- Quick implementation tips
 - Model one example before students begin independently.
 - Remind students to round first, then estimate.
 - Encourage students to explain why they rounded up or down.
- Differentiation strategies
 - Allow students who need support to use a place value chart.
 - Challenge advanced students to compare the estimate with the exact answer.
 - Pair students to discuss their rounding choices.
- Engagement ideas
 - Ask students to vote whether each number rounds up or down before solving.
 - Let students create a similar estimation problem for a partner.
- Extension activities
 - Have students write one real-life estimation word problem using shopping or travel.
 - Ask students to solve both the estimated and exact answers, then compare the difference.
