

Name _____

Jungle Safari Number Challenge

Mission 1: Which Number Is Bigger? What this skill means: When you compare two numbers, you decide which number is greater, less, or equal.

Helpful Hint: Start with the digit farthest to the left. If those digits are the same, move one place to the right until you find a difference.

Directions: Write <, >, or = in each blank.

1. The team counted 48,215 butterflies in one area and 48,251 in another.

48,215 _____ 48,251

2. One camera recorded 72,604 animal visits. Another recorded 71,999.

72,604 _____ 71,999

3. Two bird counters both recorded 36,480 birds.

36,480 _____ 36,480

4. A tiger tracker showed 59,132 steps. A second tracker showed 59,123.

59,132 _____ 59,123

5. One monkey group had 84,701 sightings. Another had 84,710.

84,701 _____ 84,710

6. A jeep traveled 27,995 meters. Another traveled 28,005 meters.

27,995 _____ 28,005

Mission 2: Put the Numbers in Order - What this skill means: Ordering numbers means putting them from smallest to largest or largest to smallest.

Directions: Write each group in the order shown.

Three elephants traveled 42,315 m, 42,351 m, and 41,999 m.

Least to Greatest: _____

8. Three parrot groups were counted: 68,420, 68,204, and 68,402.

Greatest to Least: _____

9. Three trail cameras recorded 75,901, 75,109, and 75,190 animal visits.
