

Name _____

Amazon Alliteration

Directions: Read the passage carefully. Identify **three or four key ideas or details** from the text. Create short **alliterative phrases or sentences** that use repeated sounds or letters to help you remember those ideas. Share how each alliteration works as a memory aid.

The Amazing Amazon Rainforest

The Amazon Rainforest is often called the “lungs of the Earth” because it produces a large portion of the world’s oxygen. It is home to millions of species of plants, animals, and insects, making it one of the most biodiverse regions on the planet. The rainforest also plays a key role in regulating Earth’s climate by absorbing carbon dioxide. Indigenous communities have lived in the Amazon for thousands of years, depending on its resources for food, medicine, and shelter. Unfortunately, deforestation threatens the forest as trees are cut down for farming and logging. Scientists warn that losing too much of the Amazon could harm global weather patterns and reduce vital habitats. Protecting the rainforest is essential for the health of the planet and future generations.

Activity: Alliteration Builder

1. Choose **three or four important details** from the passage.
2. Write an **alliterative phrase or sentence** for each detail (at least 3 words beginning with the same letter).
 - o Example: “Forest fuels fresh air.”
