

Name _____

Poland's Industry Insights Answer Key

1. Agriculture provides food for Poland and other European countries and uses the country's wide, fertile plains.
2. Mining shaped communities by creating towns built around coal deposits and influencing local culture and work life.
3. Gdańsk is a key shipbuilding center because it is located on the Baltic Sea and has a long history of building and repairing ships.
4. Jobs in software, digital design, and engineering are growing in technology hubs.
5. Traditional industries like farming and mining combine with modern technology industries to create more jobs and strengthen Poland's economy.

Teacher's Guide

Purpose

- Helps students understand how different industries contribute to Poland's economy.
- Encourages analysis using short informational text appropriate for grades 6-8.
- Builds connections between geography, history, and economic development.

Differentiation Tips

- Provide a vocabulary list for students who need support, including agriculture, mining, shipbuilding, technology, and hubs.
- Allow struggling learners to underline key evidence in the passage before answering.

Engagement Ideas

- Have students identify which industry they think is most important today and explain why.
- Use a quick class poll to explore which type of job students would prefer and connect their choices to the reading.
