## Pollution Cause Identification Chart

**Directions:** Below is a chart showing **pollution causes**. For each cause, fill in the **environmental effect** that results from it. Use your knowledge of air, water, soil, and noise pollution.

Pollution Cause	Environmental Effect (Fill in the Blank)
1. Cars release exhaust into the atmosphere.	
2. Factories dump waste into rivers.	
3. Farmers use too many pesticides.	
4. Rock concerts play at extremely high volume.	
5. Oil tanker spills fuel into the ocean.	
6. Burning coal in power plants.	
7. Trash buried in open landfills.	
8. Airplanes fly over neighborhoods often.	

**Reflection Question:** Why is it important to understand the connection between the **causes** of pollution and their **effects**? Write 3-4 sentences.
