

Name _____

Matching Pollution Types

Directions: Match each **Type of Pollution** in Column A with the correct **Source or Effect** in Column B. Write the letter of the correct match next to each number.

Column A - Types of Pollution

1. Air Pollution
2. Water Pollution
3. Soil Pollution
4. Noise Pollution

Column B - Sources/Effects

- a. Crops fail to grow because pesticides and waste leak into farmland.
- b. Loud car horns and construction disturb sleep and cause stress.
- c. Smoke and gases from vehicles and factories reduce air quality.
- d. Oil spills, plastics, and sewage contaminate oceans, rivers, and lakes.
- e. Breathing problems like asthma increase in cities.
- f. Fish die as oxygen levels drop due to algal blooms.
- g. Garbage dumps leak toxic chemicals underground.
- h. Hearing loss develops in people who work near constant loud machinery.

Extra Challenge: Choose one type of pollution and write 3-4 sentences explaining how it affects both people and the environment.
