## Illustration Insights

Strong readers use **visual clues** to make predictions about the text. Illustrations give hints about the characters, setting, and events. Predictions do not have to be correct, but they should be **reasonable** and **evidence-based**.

**Directions:** Visualize the illustration descriptions below, then answer the questions that follow.

**Picture A:** A boy wearing a raincoat and holding an umbrella is standing in front of a flooded street. He looks worried, and a small dog stands beside him.

**Picture B:** A classroom full of children is staring at the teacher, who is holding a large box labeled "Science Experiment." Some children look excited, while others look nervous.

**Picture C:** A girl is climbing a tree with a determined expression on her face. At the bottom of the tree, two friends are pointing up at her and cheering.

1. For **Picture A**, what do you predict the text will say?

---

---

2. For **Picture B**, what might happen next in the story?

---

---

3. For **Picture C**, what do you think the girl's goal is?

---

---

4. Choose **one picture** and explain why your prediction might be wrong once you read the actual text.
