

## Science In Progress Answer Key

### Correct Passage:

Our school's annual science fair is coming soon, and everyone is excited. Students **have been working** on their projects for weeks.

Lena and Josh **have been building** a volcano model that actually erupts. They **have been testing** the baking soda and vinegar mixture every day.

Meanwhile, Mia **has been researching** how plants grow in different types of soil. She **has been keeping** detailed notes in her journal.

The teachers **have been guiding** the students by giving them advice and feedback. The whole class **has been preparing** displays and posters to present their findings.

Parents **have been supporting** their children at home by gathering materials. Everyone **has been looking** forward to the big event next Friday!

### Teacher Notes:

- Remind students that **has/have + been + verb(-ing)** is the correct form.
- Point out that the tense shows **actions that began in the past and are still continuing now**.
- Encourage students to check **subject-verb agreement**: "He/She/It has been..." vs. "They/We/You have been..."
- Extension idea: Students can write **two more sentences** about their own preparations for a school event using this tense.
