Teacher's Notes:

- **Common Errors:** Students often confuse past simple with present perfect. Remind them that present perfect links the past to the present (something has happened at an unspecified time or has relevance now).
- **Extra Support:** For weaker students, underline "time clues" (e.g., *already, yet, many times*) to help guide tense choice.
- **Extension:** Have students create their own holiday-themed sentences using the present perfect tense and share with a partner.
