Name _____

Café Price Board Answer Key

1. $3.60
2. $2.80
3. $6.40
4. $4.80
5. $7.00
6. $4.00
7. $7.20
8. $8.70

Teacher's Guide

- Quick implementation: Review that students first multiply the cost by the markup rate, then add the dollar markup to the original cost.
- Differentiation: Let students write the dollar markup beside each menu item before calculating the selling price. Provide percent-to-decimal conversions as needed.
- Engagement: Assign students the role of café pricing manager and have them complete all eight prices before the fictional café opens.
- Extension: Have students choose three menu items, calculate the total cost to produce them and the total selling price, then find the combined dollar markup.
