Name _____

Pricing in Action Answer Key

1. $12
2. $90
3. $30
4. $16
5. $90
6. $20

Teacher's Guide

- Quick implementation: Review the meaning of cost, markup, selling price, markdown, and sale price before students begin.
- Differentiation: Have students underline the given amounts and circle what each problem asks them to find. Provide pricing formulas for students who need additional support.
- Engagement: Present the six scenarios as pricing decisions from different businesses. Have students identify the type of business calculation before solving.
- Extension: Ask students to write one new pricing word problem involving either markup or markdown and solve it.
