Name _____

Price It Right Answer Key

1. $15.00
2. $24.00
3. $31.20
4. Markup: $8.00; Selling price: $40.00
5. $58.50
6. Markup: $18.00; Selling price: $78.00
7. $106.25
8. Markup: $24.00; Selling price: $144.00

Teacher's Guide

- Quick implementation: Review that selling price equals cost plus dollar markup. Remind students that some problems require finding the markup first.
- Differentiation: Have students needing support complete the problems with provided dollar markups first. Allow a calculator when appropriate.
- Engagement: Tell students they are pricing merchandise for a new store and must prepare all eight items for sale.
- Extension: Ask students to choose three products and calculate what a customer would pay if each selling price were discounted by 10%.
