Name _____

Trial Tracker

Directions: Use the results from 50 spinner trials. Find each experimental probability and simplify when possible.

A spinner numbered 1 through 5 was spun 50 times.

Result	Number of Times
1	8
2	12
3	9
4	14
5	7
Total	**50**

1. What is the experimental probability of spinning a 1? _____

2. What is the experimental probability of spinning a 2? _____

3. What is the experimental probability of spinning a 4? _____

4. What is the experimental probability of spinning a 5? _____

5. What is the experimental probability of spinning an even number? _____

6. What is the experimental probability of spinning an odd number? _____

7. What is the experimental probability of spinning a number greater than 3? _____

8. What is the experimental probability of spinning a number less than 4? _____
