Name _____

Chance Check Answer Key

1. Impossible
2. Equally likely
3. Certain
4. Likely
5. Unlikely
6. Likely
7. Equally likely
8. Impossible
9. Equally likely
10. Unlikely
11. Unlikely
12. Certain

Teacher's Guide

- Quick implementation: Review the five probability terms before students begin. Emphasize that students should consider how often an event could happen.
- Differentiation: Provide students with a probability scale labeled impossible, unlikely, equally likely, likely, and certain.
- Engagement: Have students compare answers with a partner and explain one classification using the information in the event.
- Extension: Ask students to create one new everyday event for each of the five probability categories.
