Name _____

Probability Checkpoint Answer Key

1. B. Impossible
2. Likely
3. C. 1/2
4. {A, B, C, D}
5. 2/6 = 1/3
6. 3/10
7. 18/30 = 3/5
8. Experimental
9. 20 times
10. C. 4
11. 1/6
12. C. Rolling a number less than 7

Teacher's Guide

- Quick implementation: Use the quiz as a concise review after students have practiced simple, experimental, and compound probability.
- Differentiation: Allow students to list favorable and total outcomes beside calculation questions before writing each probability.
- Engagement: Have students complete the quiz independently, then compare selected answers with a partner and justify their choices.
- Extension: Ask students to create one additional question involving a compound event and provide its answer.
