Name _____

# Chance Scale Answer Key

A. 0
B. 1/2
C. 3/4
D. 1/4
E. 1
F. 1/2
G. 1/4
H. 3/4
I. 0
J. 1/2

## Teacher's Guide

- Quick implementation: Review that 0 means impossible, 1/2 represents an even chance, and 1 means certain. Have students determine each probability before placing its letter on the line.
- Differentiation: Allow students to write the probability beside each event first, then transfer the letters to the probability line.
- Engagement: Have students compare placements with a partner and explain how they determined one event's location.
- Extension: Ask students to create one new event with a probability of 1/4, 1/2, or 3/4.
