Name _____

Probability Sprint Answer Key

1. 1/2
2. 1/6
3. 1/2
4. 3/8
5. 1/2
6. 3/8
7. 3/10
8. 2/3
9. 1/2
10. 1/3

Teacher's Guide

- Quick implementation: Review the rule: probability = favorable outcomes / total possible outcomes. Have students simplify fractions when possible.
- Differentiation: Let students list all possible outcomes before identifying the favorable outcomes.
- Engagement: Provide coins, number cubes, counters, or simple spinners so students can test selected problems after calculating.
- Extension: Have students choose three problems and predict whether the probability is less than, equal to, or greater than 1/2 before calculating.
