Name _____

Chance in Action Answer Key

1. 3/10
2. 1/3
3. 1/4
4. 1/3
5. 3/10
6. 8/15
7. 1/2
8. 1/3

Teacher's Guide

- Quick implementation: Have students identify the favorable outcomes and total possible outcomes before writing each fraction.
- Differentiation: Provide the probability rule, favorable outcomes / total outcomes, for students who need extra support.
- Differentiation: Ask advanced students to write the probability of the opposite event for each problem.
- Engagement: Let students use counters, a number cube, or a simple spinner to model selected problems.
- Extension: Have students create one original probability story with a fraction answer for a partner to solve.
